

This letter is to voice my disagreement that the Canadian Postal Service should be privatized.

This is an efficient and economically operated service that brings good value to the whole country and there is no other need to privatize this service other than to appease the US corporations that want to get into our country to make a profit. Private mail couriers are not concerned with the public opinion unless it will increase the profit/bottom line and most of the corporations are not Canadian. Again this government is working hard to destroy the sovereignty of Canada and sell our country to any US corporation that has a high bid.

Scrap NAFTA and the Security and Prosperity agreements and give us back our sovereignty and PLEASE leave the Canadian Postal Service alone, it is doing a great job of serving the Canadian people and it does not need to be privatized or altered in any way by this ideologically run government.
