Canada Post

## Re: Post Office

The Northern Village of Buffalo Narrows Mayor and Council wish to advise your corporation that the public in all municipalities should be consulted with in regards to the possible closing of postal outlets.

Canada Post has been running for a long time and without these services in our communities it would be awkward for all the people that are not directly linked to the technology that is available.

Most people in the North still rely on Canada Post Offices and would be very disappointed if these services are removed. So for the benefit of all Canada Post must consult with the public, the users of these services.
