

no to deregulation-bill c14

hello there,

this is cheryl ann fong, i have a letter sent out to you, I am writing you once again to add on to my letter, I found this posted in the production facility in calgary when I visited there, and the company's VISION is:

canada post will be a world leader in providing innovative physical and electrical delivery solutions, creating VALUE for our customers, employees and ALL CANADIANS.

this is just a reminder to the board, it said all canadians, if the post office is deregulated, it is now providing to all canadians now since the regular joes wont have access to that. no private company have the capacity or the structure to deliver mail the way canada post have set up and capable of.

dont cripple our brothers and sisters up north and other suburbs. PRIVATE companies wants PROFITS, this is your obligation as well as a part of the community to go against it because you will think it might not affect you now, think of the future generation as well. think of what they will go through not seeing the service we are enjoying now.

thanks once again.

cheryl ann fong
