

I am writing this submission based on the possible deregulation of Canada Post. The panel needs to realize that a crown corporation which is not government funded and is profitable every year with a content society is doing a job well done. If it is not broke, don't fix it. What we need is the best interest of All Canadian citizens receiving a service and not the best interest of the government making a profit. Canada Post started out as a service, not a financial source of income for the government. We need to look at the best interest of our people and not follow other countries who are proving that deregulation does not work
