

Firstly, let me express my concern about the virtual secrecy within which this "review" is being conducted. Without public hearings, and with a public comment period hidden in the summer, the process seems designed for failure.

I urge you to conduct a real public review, with public hearings, and reasonable advertising of the review, so that all Canadians have the opportunity to make informed comment.

Overall, I am very happy with Canada's postal service and opposed to deregulation.

Deregulation and the ending of Canada Post's monopoly on domestic mail service will surely lead to cost increases and service decreases for Canada's North.

In this regard, I echo the comments made by Yellowknife's mayor and urge you to consider the negative impact deregulation would have on the Northern territories and the people who make their home in the North.
