

To the Canada Post Corporation Strategic Review:

We would like the Canadian Postal Services to remain a publicly owned enterprise, responsible to parliament and to the Canadian Public. We are very concerned about the trend of the current Conservative government's erosion of public services and lowering of corporate and private income tax. Public Services are one of the strengths of our great and diverse nation and one we are proud of.

We live in a rural area surrounded by very small communities and the current public postal service is very valuable to us.

UPS parcel service is much less reliable for parcels than Canada Post taking up to 7 days to deliver in a distance where Canada Post takes one day (because it is so near not because of a surcharge)

Please do not deregulate and commercialize the letter market by opening it to competition.

Thank You very much from the Marshalls of Marshall Forestry Services and Bauer Creek Ranch

Jane and Fred Marshall
