

Dear Federal Government

This is in regards to the review called Canada Post Corporation Strategic Review. Why are you in such a hurry to tear down a good thing? The postal service is affordable to all walks of life and still making a profit! In the last 10 years alone Canada Post has paid a dividend to the federal government well over \$500million. The public postal service was meant to service the public and reinvest in the service, not maximize profit. If they had taken that \$550million dollars and put it back into the corporation the prices would still have gone up but not at the same rate. Canada is one of the cheapest countries to mail an item, guarantee the service, and be able to track almost anything. Once again WHY are you trying to kill a good thing??????????????

Thank you
I think full
